

"This is an Uprising" by Mark and Paul Engler

By Terry Lowman, Co-chair

We want justice, when do we want it? NOW! But that's not how justice works; it a long tedious slog. The Occupy Movement was criticized for doing nothing, but that's not true. The 1% and the 99%, the very language of economic justice, came out of the Occupy Movement and without language, you have no movement. This book charts the history of movements and proves that movements take time and careful planning (despite the appearance of spontaneous combustion). This book explains how to empower justice movements. Visit the official website [here](#).
