

Following are two resolutions passed by UUA General Assemblies that guide UU Congregations and the UUA itself in the work to provide the legislation and practices to provide healthcare, jobs, infrastructure, environmental practices and research to ameliorate climate change and right the structures of inequality in order to bring all people and the environment through this climate crisis. These documents provide guidance to the work of the Green New Deal Task Force of UUJEC and encourage fulfillment of their intent for our Association of Congregations. We believe that our GA Resolutions are not simply statements of the moment but intended to initiate long term action toward their fulfillment.
